The minutes flash

5 Adjust the value

Move forward or backward +/-15 minutes

6 Confirm and exit setting mode

The seconds cannot be set and are always identical to T1

LAP

Timing in LAP mode (lap time)

Information

The LAP function is a chronometer designed to measure the lap time in a running race or motor race.

For example: measuring the lap time taken for a long-distance runner.

Measurement range

Maximum measurement time	100 days
Measurement resolution (less than 1 hour)	1/100"
Measurement resolution (more than 1 hour)	1"

Minutes-seconds-hundredths display

Hours-minutes-seconds display

Use

1 Select the LAP chrono

 *To be able to select the LAP function, the SPLIT chrono needs to be reset and vice versa*

2 Start timekeeping

3 Each time the runner completes a lap, press to record the lap time

 *The recorded time flashes on the display for 3 seconds, then the current timing is displayed again*

4 On the runner's last lap, stop timekeeping

 *The last lap time is recorded*

5 Display the first recorded time

 *After 2 seconds, the time is displayed*

Press again to display the next time

 *Press twice to go directly to the next time*

 *After 20 seconds, the display returns to the total time*

**6** **Resetting the chronograph to zero**

 *Resetting the current timing to zero deletes the stored data*

SPLIT

Timing in SPLIT mode (split times)

Information

The SPLIT function is a chronometer for measuring the total duration of a race for up to 99 runners or vehicles participating in the same timed event.

For example: measuring the finish time for several runners in a 100-metre sprint.

Measurement range

Maximum measurement time	100 days
Measurement resolution (less than 1 hour)	1/100"
Measurement resolution (more than 1 hour)	1"

Minutes-seconds-hundredths display

Hours-minutes-seconds display

Use

1 Select SPL chrono

To be able to select the SPLIT function, the LAP chrono needs to be reset and vice versa

2 Start timekeeping

The first split time is measured

3 Timing in SPLIT mode

As each runner passes, press to record their time

The recorded time flashes on the display for 3 seconds, then the current timing is displayed again

4 When the last runner passes, stop timekeeping

5 Display the first recorded time

 *After 2 seconds, the time is displayed*

Press again to display the next time

 *Press twice to go directly to the next time*

 *After 20 seconds, the display returns to the total time*

**6** Resetting the chronograph to zero

 *Resetting the current timing to zero deletes the stored data*

TIMER

The TIMER function enables you to start a countdown of up to 23 hours 59 mins 59 secs.

Setting

1 Select TIMER

2 Enter setting mode

The whole screen flashes once, then the hour flashes

3 Adjust the value

4 Confirm and move on to the next setting

The minutes flash

5 Adjust the value

6 Confirm and move on to the next setting

The seconds flash

7 Adjust the value

8 Confirm and exit setting mode

AL

The watch is equipped with an alarm function that beeps at the set time.

How it works

At the set time (relative to T1), a **beep** will sound for 30 seconds, and the display will flash until the alarm is **cleared**.

General information

- There is no alarm snooze feature.
- The alarm is deactivated for:
 - setting the time T1;
 - setting the alarm;
 - the watch is in deep power save mode after manually entering this mode

Setting

- 1 Select AL

- 2 Enter setting mode

 *The whole screen flashes once, then the hour flashes*

- 3 Adjust the value

- 4 Confirm and move on to the next setting

 *The minutes flash*

- 5 Adjust the value

- 6 Confirm and exit setting mode

 *The alarm is activated*

Clearing the alarm

- 1 Press any push-button

 *The alarm remains active for the next set alarm time (see deactivation below).*

Activating/deactivating the alarm

- 1 Select AL

- 2 Press to deactivate the alarm

 *The alarm is deactivated*

- 3 Press again to reactivate the alarm

OTHER

Light

Illuminating the display

Press to light up the display

Light duration: 5 seconds

Pressing any push-button extends the illumination time

When the light is on, the sound is off

Sound

Activation/deactivation

Press the 2 push-buttons simultaneously to activate or deactivate the sound.

When the sound is activated, the watch will beep when the push-buttons are pressed.

In all modes except LAP and SPLIT

Standby

Exit standby mode

In standby mode, press to reactivate the watch

Battery

When the display shows "bat", the battery needs replacing.

Have the battery replaced by your dealer
